

## Tally does an Outstanding Job Reporting Outstandings for Jiva Public School

“Tally is one of the best software and very good to maintain accounts and financial data.” says Mr. Deepak Jha, Accounts Officer

### Customer Overview

The story of the inception of Jiva Public School travels back to 1983, when Rishi Pal Chauhan, an engineer from Faridabad, decided to make a difference to the community. He was distressed by the fact that although India was full of immense knowledge, resources and talent, it was still unable to realise its full potential. Once the citadel of learning, it was sadly plagued with problems related to energy, pollution, water and civic rights. He researched and studied the situation for years, finally coming to the conclusion that social transformation through education was the cure for all these maladies. Soon he set about developing a project that would help bring about greater social and economic growth to India.

He travelled to the United States of America and in 1989 met with Steven Rudolph, an educationist who recognised India's latent potential and the decisive role it was set to play in future global scene. Consequently the duo returned to India in 1994 to establish the Jiva Public School in Faridabad, as a model institution of learning that would combine the ancient wisdom of India and the technological advancement of the West. Jiva Public school is supported by these two strong and distinguished pillars – visionaries who took upon themselves the daunting task of bringing about a positive change in the Indian society.

Since then Jiva public school has grown steadily to fulfill the dreams of its founders. Its dedicated faculty, students and their families have contributed to its success and walked hand-in-hand in this gratifying journey. Jiva Public School today is a genuine community of learning.

### Business Challenge

The number of students is quite high. The collection of fees from each student was taking a long time. Added to the woes, the outstanding collection of fee from the students was a more tedious job. The school was under great pressure to prepare the fee outstanding from students on time and accurately. Every month 7-10 days were required to prepare the fee outstanding of the students. Other details of students like Bus Number, Sibling details, Date of Birth, Class, Mother's Name etc., were also not available. It was also a very tiresome job to manage transport and fee concessions of each student. A parallel record was also being maintained in Excel for cross-checking of records. The school management turned to the Partner who supplied them the Tally.ERP 9 license – JVC Academy in Faridabad.

### The Solution

JVC Academy was commissioned to implement the customised solution at Jiva Public School. Mr. Chander Dua, CEO, JVC Academy narrates, “We studied their processes and suggested the implementing of a micro vertical solution built on Tally, designed especially for schools. Post implementation, the school was able to redeploy one resource to some other job.”

A demo was given to the school authorities. Once it was decided to go for the micro vertical solution built on Tally.ERP 9, within the next 5 days the implementation took place. "The implementation was successful," says an exuberant Mr. Dua. "Now, for the nine people who operate Tally in the school, the work has become easier and the reports are more accurate."

Mr. Chander Dua, CEO  
JVC Academy

Mr. Deepak Jha, Accounts Officer, Jiva Public School states that the fee generation, outstanding fee pending from students, birthday list of the students etc., are the additional features on Tally.ERP 9 customised by the Partner.

Now, the School is getting the outstanding balance correctly. Fee report of 1700+ students studying in various classes is being generated in just 2 minutes. Fee Collection has also become faster now. The other relief is that there is no need to maintain separate record. Their staff are happy and now get time for taking up other duties. Getting MIS reports has become very comfortable and they are more accurate. Updated data is being regularly received.

Mr. Deepak Jha continued his narration, "We are maintaining our accounts on time and properly. It is very comfortable to execute the data, prepare the balance sheet and the trial balance. All these are found in default Tally. Student masters and outstanding were added by the Partner through his micro vertical solution for schools.

When asked about JVC Academy, Mr. Jha happily related, "I find JVC Academy's service very good. I have not had any problems. Mr. Chander Dua is always helpful. Even during any error while doing an entry, he will arrange help within 20-30 minutes".

Jiva Public School - Faridabad

As per Mr. Jha, in the manual system it was difficult to find anything easily. With Tally's software solution and the additional option, it is very easy to find anything with just one click. Entry of large number of vouchers was time-consuming. Now it is done in 3-4 seconds.

Mr. Deepak Jha's parting words were, "In the other software, you have to create, do what the software instructs, then find the required result. In Tally, you can create anything, anywhere and anytime. You can modify any ledger as a screen feature. In other software you have to go to the masters. You have to go back to the beginning. Tally lets you do anything you want. Thank you Tally!"

## BENEFITS

- Easy access for entry of data
- Better control over the outstandings
- Variety of reports as required
- Speedy availability of reports
