**New Delhi, February 23, 2011:** Tally Solutions, a leading business management software company announced the launch of Tally.ERP 9 Series 'A' Release 3.0, specifically designed for seamless business execution.

With this new release, Tally introduces new features and enhanced functionalities including the incorporation of the new Rupee symbol; extending its reach in the Middle East with the introduction of its bidirectional language feature; simplification of business processes via Job Work, and Payroll via Income Tax for payroll. With all this and a host of other new capabilities Tally becomes India's most comprehensive business management software and extends its reach beyond borders, said a company release.

"Most often simple is confused with basic, Tally.ERP 9 is very simple to use, yet comprehensive. The focus has been to absorb the complexity of providing a simple yet functionally rich and flexible product. With the inclusion of the Rupee symbol, Job Work, etc., the capability of Tally.ERP 9 has gone a couple of notches up," said Shoaib Ahmed, President, Tally Solutions.

Tally.ERP 9 Series 'A' Release 3.0 allows the use of the new Rupee symbol, thereby addressing the pressing needs of the industry in terms of output capability.

Tally also provides another interesting feature that facilitates for 'inter-currency' conversion. It allows the user to select a base currency (say INR in this case) and converts the consolidated reports of all international branches of the business into the same. Hence, if a business unit has branches in the US as well as UK, The reports will be churned out not with the corresponding '\$' or '£' values. This facility however requires the user to feed the current currency values into the system to enable this function.

*According to the release, the other compelling features are:*

Tally.ERP 9 is compatible with languages that follow the right to left script. On selecting Arabic as the display language, Tally.ERP 9 will switch over to the right to left script retaining all the existing functionalities and reports intact.

The Banking module now makes transactions easier to record, execute, and monitor by filters such as dates, payment modes, and modes of transactions thereby simplifying records paving a comprehensive route for smooth bank reconciliations.

The enhanced cheque printing configuration with a separate "Cheque Printing" report enables multiple cheques printing with ease. The unique benefit here is that the cheque details can also be recorded after printing.

The Job Work module promises to reduce cycle times, increase efficiency and cut costs; it has the capability to create easier manufacturing workflows and simplify inventory management. Multiple order tracking, tracking of stages of Work-In-Progress or assessing the status of finished goods becomes easy.

The Income Tax for Payroll feature enables hassle free processing of employees' salaries, calculates tax and submitting of returns such as ITR1 as well as covers relevant statutory compliances like Form 16A, Form 12BA, PF, ESI, PT, Gratuity, etc., said the release.
