Tally Solutions to expand globally Tribune News Service

Chandigarh, March 3

Leading business management software provider, Tally Solutions, is now planning to go global. Having achieved a 93 per cent market share in India, the company is now targeting West Asia, Africa and South-East Asia to expand its operations.

Talking to The Tribune here yesterday, Harish Rajput, head business development, Tally Solutions, said though they had already entered Dubai market, they were now targeting other countries in the Gulf region with the launch of an Arabic version of its ERP solution. "This will definitely push up our market share. We will also be entering new markets like Ghana and Tanzania, besides Singapore, Nepal and Sri Lanka," he said.
